NOTIFICACIÓN

La información consignada en el presente informe es producto del análisis de múltiples fuentes, de terceras partes e investigación propia del equipo CSIRT. La información contenida en los informes o comunicados está afecta a actualizaciones, por lo cual se recomienda establecer una cuarentena preventiva respecto de los IoC mencionados, previa evaluación de impacto en servicios productivos; una vez que sus plataformas de monitoreo no detecten actividad maliciosa, se debe evaluar la posibilidad de liberar del bloqueo a los IoC consignados en el reporte respectivo, tales como servicios de hosting, de cloud o similares.

Estos casos de phishing no involucran directamente a las entidades ni al sistema bancario, sino que son técnicas de fraude indirecto, en las que en infraestructura externa a éstas se arma el mencionado phishing, para construir el engaño. Las entidades, en general, al tomar conocimiento de estos portales maliciosos articulan, dentro de sus potestades y marco legal vigente, las acciones necesarias para poder desarticularlos, pero ciertamente los usuarios también estamos llamados a estar atentos a estos intentos de engaño.

Resumen

El Equipo de Respuesta ante Incidentes de Seguridad Informática (CSIRT), comparte una serie de Indicadores de Compromiso (IoC) obtenidos del análisis realizado a múltiples campañas de phishing con archivos adjuntos que contienen malware, los que están circulando en el ciberespacio nacional y representan un riesgo para los sistemas informáticos, así como para los usuarios en general. CSIRT recomienda a los administradores y usuarios bloquear los hash publicados en este informe, y mantener un permanente monitoreo sobre el resto de los Indicadores de Compromiso.

Observación

Solicitamos tener en consideración las señales de compromiso en su conjunto.
